

Project Design Phase

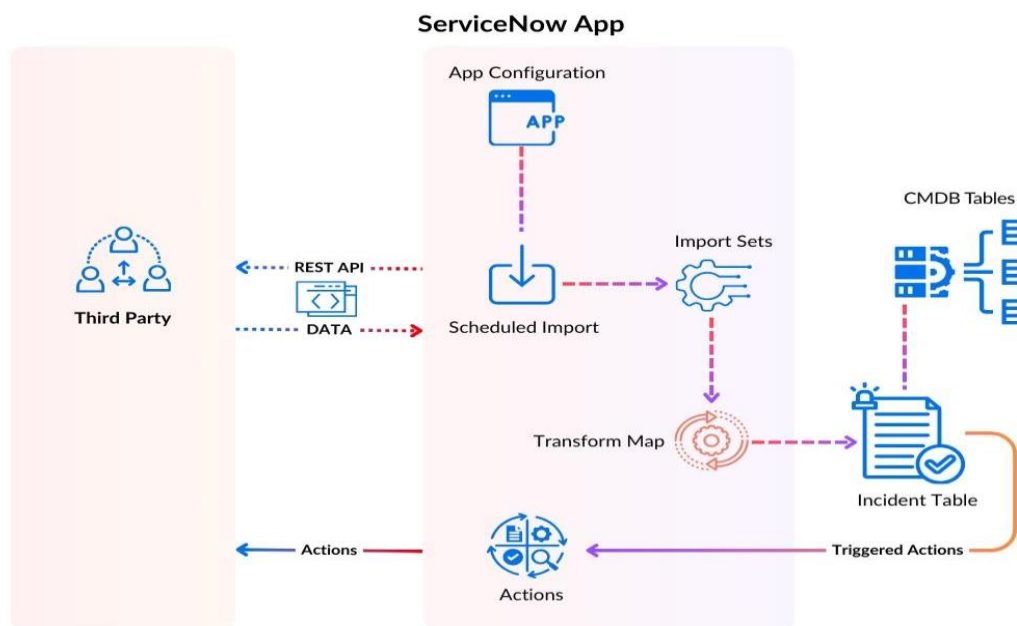

Solution Architecture

Date	29 th June2025
Team ID	LTVIP2025TMID31063
Project Name	Importing and securing Data in servicenow
Maximum Marks	4 Marks

Solution Architecture:

A ServiceNow solution architecture for importing and securing data typically involves data sources, an integration layer, the ServiceNow platform, and security measures. The process flow diagram would show data extraction from sources, transformation and loading into ServiceNow, and security enforcement through roles, access controls, and encryption.

Example - Solution Architecture Diagram:
